# WOOD CONCEPT

PASSION OAK BEIGE

CLASSIC OAK GREY

CLASSIC OAK WHITE

The Wood Concept collection has been enhanced with new designs. The Passion Oak collection has been created for enthusiasts of contemporary interiors and natural design. The oak plank pattern has been precisely reproduced, and the shades faithfully maintain the latest colour trends. The tiles in this collection truly imitate the structure and grain of natural wood. The aesthetic qualities of wood have been combined with the exceptional durability and resistance of gres tiles.

PASSION OAK COLD BEIGE

Passion Oak is an excellent choice for anyone seeking original and yet practical arrangements for their home and working spaces. With fractures and strong, precise grains they emphasize the solid character of the tile. The natural look of the oak planks has been achieved thanks to the unique structure – subtly wavy and perfectly underlining the grain. Undoubtedly the collection will win the hearts of interior decorators and anyone else who loves good design.

NATURAL ASH BEIGE

The Natural Ash collection was inspired by the wood of the ash tree. The stoneware boards are gently shaded and their grain is natural and very subdued. The colours available for this line relate to the warm shades of beige. The Natural Ash collection is the quintessence of contemporary style, and will appeal to anyone who values Scandinavian simplicity.
