The line of rectified wall tiles by Opoczno in the 24×74 cm format includes a wide and diverse choice of patterns, a modern interpretation of the classic materials used for interiors. It is an option for the kind of customer who values timeless solutions, yet also seeks interesting ideas in line with current trends. The 24×74 cm collection includes patterns in concrete, natural stone as well as eye-catching structures: geometric, wave motif and linen texture. The attractive yet versatile 24×74 cm wall tile format allows their use in both small and spacious bathrooms.

A subtle version of concrete in two shades: grey and cream. The delicate nature of the collection is further emphasised by the soft satin glaze, which breaks the raw nature of concrete and leaves the tile pleasant to the touch. The structure featuring a wave motif ensures an extremely attractive flowing wall effect. The combination of soft texture, satin glaze and concrete graphics is responsible for the natural and organic character of the collection. In combination with wood-like floor tiles, it creates an atmospheric interior design in a contemporary style.

- frost resistance
- abrasion resistance
- non-slip class
- matt tiles
- satin tiles
- structural tiles
- lappato tiles
- suitable for floor heating
- rectified tiles
- tonal wall tiles
- tonal floor tiles

The collection in two shades of grey for anyone who loves subdued interiors. The smooth concrete surface is broken by a unique „triangle” structure, which brings to mind origami art. The satin finish adds softness to the tile, so that this version of concrete looks great in combination with natural materials like wood and wicker. It is a perfect choice for minimalist interiors aiming for a touch of natural elegance. It makes a spectacular backdrop for gold or copper-coloured accessories and bathroom fittings.

Rakaro is a collection based on classic concrete graphics, stepping beyond the conventional representation of a concrete surface. The raw nature of the material is broken by darker tones and additionally enriched by tiles having an irregular, striped texture which gives a 3D effect. The matt finish gives the whole a subtle look. This collection is for people looking for solutions that combine tradition with modernity in an original way. It forms an excellent base for arranging a minimalist space, as well as a comfortable family interior, one designed to last for years.

Terracotta-coloured tiles are in line with the latest interior design trends. The Claret collection uniquely combines artisanal simplicity with a sophisticated look. The colour is a balance between the shade of burnt clay and the richness of red wine, broken by graphics imitating linen textures. This uniqueness is achieved thanks to the use of a special reactive ink. The textured and geometric pattern from the same collection gives the whole line a modern twist. It is a collection for anyone who enjoys extraordinary design and current trends. It goes well with currently trendy, matt, black bathroom fittings and accessories.

A synonym of elegance in satin white. The collection consists of white smooth and structured tiles with a popular wave motif. The satin finish of the surface gives an impression of softness, so that the whole bathroom feels naturally comfortable. Ola Bianca is a collection intended for anyone who appreciates a timeless mix of décor and elegance. It is a perfect solution for bathrooms decorated in a glamorous, classic or modern style. The chic nature of the collection is emphasised by the combination of white with gold accessories. In stylish arrangements it can be broken with a wood style floor laid in a chevron pattern.

A classic with a modern twist. Santis is a collection based on contrasts, combining strength and softness in the form of both very strong and extremely subtle stone graphics. Thanks to the clear stone pattern, it creates a bold design with a strong character. At the same time, it still leaves significant freedom in terms of design and possibilities for balance, which can be achieved in combination with tiles featuring a delicate pattern. Depending on the nature of the project, it can form the basis of traditional interiors as well as contemporary, eclectic spaces.

The distinctive feature of this collection is the timeless marble pattern. The tiles are decorated with a stone pattern having interspersed grey and copper threads on a white background. The natural look of the material is enhanced by the satin surface. Thanks to this a bathroom featuring these tiles becomes not only stylish but cosy too. The elegant white stone pattern gives a room an air of unique freshness. Smooth tiles can be accompanied by textured tiles with a horizontal stripe motif, ideal for use on selected parts of walls. This decorative trick adds a certain lightness to the room.

The Alcamo collection is a modern interpretation of the natural beauty of light stone. The graphics have been designed so that this classic pattern can impress and suit even smaller rooms. The light background of the tile is broken with delicate red and copper threads. The delicate pattern gives the room a unique and modern character. The satin glaze, on the other hand, gives the design uniqueness with a romantic touch.

The design of the Meer collection is based on the pattern of one stone that has many faces, diverse in terms of graphics and colours. Each line or abrasion is in a different colour and shade. Such a rich and varied stone pattern makes each tile different, while the collection itself offers many possibilities for design and use in interiors. This unique design is a perfect base for a bathroom in any style, from classic to ultra-modern. Dedicated floor tiles with the same graphics make it easier to create a uniform and coherent whole.
