		RIBERO BEIGE	6	VIDAL WHITE	8
				VIDAL BEIGE	10

Modern bathrooms have become somewhere that allows us to enjoy practical solutions, without forgetting the elements of rest and relaxation. Bright colours continue to be popular and enjoy much support. This is why it is worth focusing on choices that can form the basis for a timeless bathroom that follows the current trends. Ceramic tiles measuring 30 × 60 are a perfect solution for the walls of both small and large bathrooms. Shades of grey, beige and white all make the interior feel more spacious and natural. Thanks to the use of tiles featuring a subtle structure and colouring, you can match accessories in almost any style, to create diverse arrangements as a result.

GLOW is a collection where a classic white tile is enhanced with a horizontal glossy pattern. The use of glossy colouring results in a subtle effect, so that the tile can be safely used to cover entire walls. A floor in a subdued colour scheme finished with gently glittering micro-granilia makes a balanced complement to a modern arrangement. With its simple and modern form, this tile works well in bathrooms in which minimalism, classic style and industrial character are dominant.

## APPLICATIONS

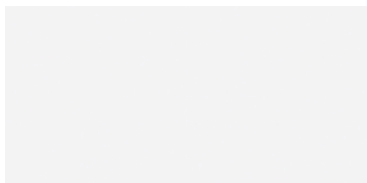

WALL TILES (INTERIORS) FLOOR TILES (INTERIORS and EXTERIORS)

- stain resistance
- frost resistance
- abrasion resistance
- non-slip class
- satin tiles
- microgranilia
- suitable for floor heating
- rectified tiles
- tonal tiles

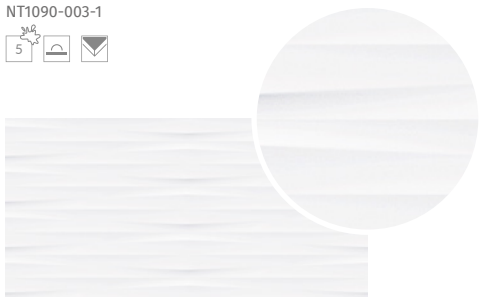

A subtle character of the RIBERO collection is the effect of the bright colours – white and beige. The tiles have been enhanced with a structured surface. This has resulted in a consistent and original combination. The regular, horizontal and modernistic structure offers the possibility of creating an interior that is universal and full of natural beauty. And the smooth tiles complete and balance the whole. The walls in a subdued colour scheme highlight the desired solid pattern of a French herringbone on the floor.

# VIDAL GREY & WHITE

CONCRETE

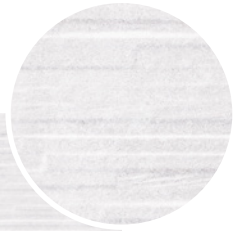

The shades of grey and white are integral to a modern and universal bathroom. Subtle satin tiles from VIDAL collection are characterised by neutral colour and original structure. The linear pattern with a slate-like feel matches the soft engraving of concrete. This original combination uniquely refracts light, creating a pleasant and atmospheric interior. The combination of soft texture and satin glaze with concrete engraving creates a natural, organic feel for the collection.

## APPLICATIONS

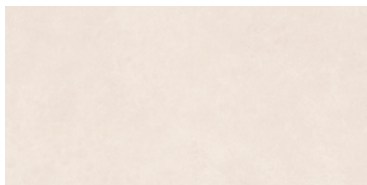

WALL TILES (INTERIORS) FLOOR TILES (INTERIORS and EXTERIORS)

- stain resistance
- frost resistance
- abrasion resistance
- non-slip class
- matt tiles
- satin tiles
- structural tiles
- tiles with coloured body
- suitable for floor heating
- rectified tiles
- tonal wall tiles
- tonal floor tiles

Concrete is one of the trends that has permanently found its place among contemporary style canons. The engraving of VIDAL ceramic tiles is a gentle representation of concrete. The warm beige of the concrete surface and the slate-like structure create a unique combination that perfectly combines the trends. A bathroom decorated with these tiles will be warm and soft. And the linear pattern will make the interior optically larger.
