BATHROOM, SUITABLE FOR MOST
CONCEALED CISTERNS AND
SHOWER CABINS

SEASONS OF BEAUTY

True beauty never fades, it is timeless. So it is with our new collections of wall tiles. The collections impress with a wealth of patterns that fit into any interior. The timeless beauty of each collection will elevate any room with our tiles to class and elegance in itself. The collections impress with a wealth of patterns and colors, allowing for the creation of unique compositions. From classic elegance to modern minimalist designs - everyone will find something for themselves here.

TRIASO

29×89

The TRIASSO collection is a harmonious composition inspired by the natural and stony aspect of cement. The base graphic features delicate, beige squares set against a warm, beige background. The collection will be appreciated by connoisseurs of good taste and elegance who prefer color minimalism. With the Triasso collection, it is possible to design a coherent and calming interior in a modern, monochromatic style, limited to beige tones.

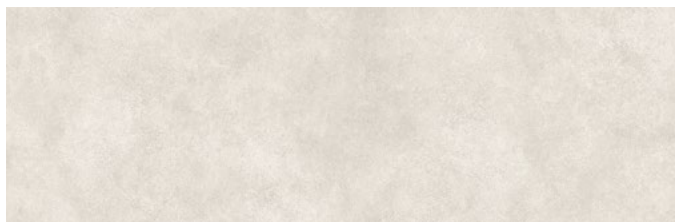

The base tile of Triasso is complemented by a structured tile in the same format and color, as well as a stoneware that will further enhance the mono look in the interior. A bit of contrast will be added to the space by accessories in stony colors with varied textures or black fixtures, which will look fantastic against the warm, matt backdrop.

AURANO

29×89

AURANO is a collection created based on the currently trendiest Aurisina Fiorita stone from Italy. On the beige surface of the tile, a finely grained pattern in a light shade of brown is visible, forming a subtle design. Large, smooth base tiles complemented by structured tiles in the same shade and format will create a monochromatic space with a neutral, matte background.

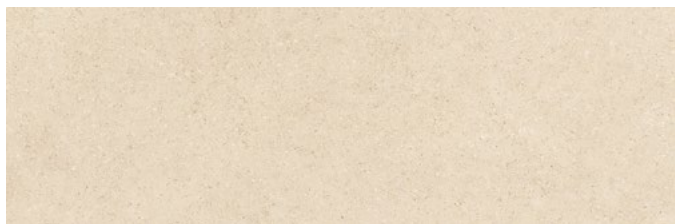

The mono look can be easily reversed by transforming the single-colored interior into a place full of contrasts. Aurano tiles combined with wood-like structural panels will transform a monochromatic bathroom into a modern spa in a soothing Japandi style. Cozy space dominated by natural materials - stone and wood, as well as warm beiges and gentle browns, will be complemented by lively plants in decorative pots, bringing color to the interior and emphasizing the closeness to nature.

SIDE CALACATTA

29×89

The SIDE CALACATTA collection is inspired by the exquisite Calacatta Quartz stone and aims to achieve timeless elegance in the interior, reproducing the depth, gloss, and veining of marble. Few, light brown veins, resembling the flow of a river, spread harmoniously across the smooth surface of the tile, creating unique patterns. These fluid lines on a light background bring a sense of spaciousness and tranquility to the interior, while the satin finish of the tiles adds brilliance to the space.

The timeless beauty hidden in the Side Calacatta collection allows for the realization of exceptional projects. Marble-like Side Calacatta tiles will meet the expectations of enthusiasts of minimalism, glamour style, and Scandinavian design. The collection is so versatile that, combined with various shades and textures - structured tiles, wood, or metal, it creates a luxurious and stylish space.

SOFTY LEAVES

29×89

The SOFTY LEAVES collection is a series of tiles that has managed to capture the beauty of nature and present its charm in neutral shades of gray. Ornamental leaves, animated by a gentle breeze, have been immortalized on a light background. The satin, smooth surface of the tile gently disperses light, adding depth and elegance to the interior, while the modern, soothing motif introduces peace and harmony.

As a decorative accent, the leafy pattern attracts attention and enriches any space. It blends perfectly with smooth, white tiles. It also creates a harmonious effect when combined with tiles featuring a delicate cement graphic. The two-piece Softy Leaves panel decoration can be continued both vertically and horizontally. This allows for achieving a harmonized effect on any section of the wall without disrupting the pattern.

FORLI LEAVES

29×89

The FORLI LEAVES collection directly alludes to nature. On the satin, smooth surface of the tile, a magical portrait of flora is presented, revealing tropical leaves shrouded in a delicate mist. This unique combination of light and muted shades of green will bring natural beauty and harmony to the interior. The panel decoration with a tropical-themed graphic and an original, soothing color palette will add freshness and expressiveness to the space.

Paired with light, smooth tiles and wooden, lamellar tiles on the wall, the collection will create a pleasant and calming interior. The wood-like porcelain floor tile is an excellent addition to the collection. This is an interesting proposition for those seeking green accents, close to nature, and who will appreciate the vibrancy of the tropical forest in the interior. Plant motifs will enliven any space and are a beautiful complement to interior design projects in boho, Scandinavian, or Japandi styles.

FLERO

29×89

The FLERO collection draws inspiration from the visually rich world of plants. The main theme is tiny and delicate flowers in natural earthy tones. The floral pattern on the white background of the tile will emphasize the unique atmosphere of the interior and allow you to arrange the space in a vintage style. The satin surface of the Flero tile will create a subtle contrast with matte tiles inspired by natural materials such as stone or wood.

Flero decorative panels will create a perfect composition with tiles in beige shades with a delicate stone pattern from the Aurano collection or with cement-imitating Triasso tiles in a similar color palette. If we additionally complement the project with wooden structural tiles, we will recreate a relaxing, nature-inspired interior.

LAMIA COLOR

29×89

The LAMIA COLOR collection inspires the creation of harmonious spaces full of three-dimensional and clean lines. It provides a sense of depth and endless possibilities for interior design. The spatial, tactile texture composed of simple patterns will enliven any room. The tiles are available in three universal shades - white, cappuccino, and graphite.

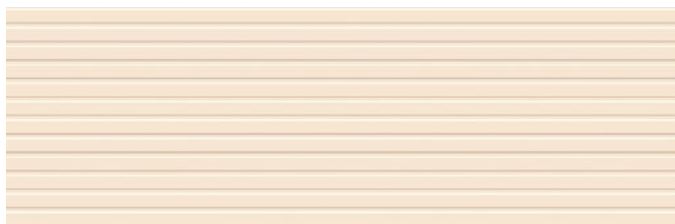

Lamia Color allows for the freedom to combine with other collections. Used as a decorative accent, it will subtly stand out against the smooth tiles from other series, and when color-coordinated with interiors arranged in the currently fashionable monochrome style, it will add character to them. The structural tiles of Lamia Color will also find their place in modern, industrial, or minimalist spaces designed in concrete, stone, or wood.

LAMIA WOOD

29×89

The LAMIA WOOD collection invites you to create a cozy, nature-inspired space. It features tiles based on the natural texture and warm shade of wood. The graphics mimic dense and diverse grain patterns as well as delicate shadows and reflections, giving interior design projects in an eco style authenticity. The spatial texture of the tile with clearly defined darker grout lines allows to emphasize the linearity of the wood graphic.

Lamia Wood tiles can be matched with any other collection and create your own unique vision of a modern interior. Wood-like patterns will perfectly complement monochrome arrangements, contrast with muted tiles in a cement shade, or imitate natural stone. As a decorative element, installed on the entire wall or selected area – under the shower or above the sink, they will bring a touch of nature to the home, as well as the associated harmony and tranquility.

TELLARO WOOD

29×89

The TELLARO WOOD collection showcases the beauty of natural wood. It captivates with its warm, pleasing color palette and exudes tranquility. The wood-like tiles with lamellar structure made of ceramics have been designed to mimic nature - adorned with fine and irregular grain patterns. They introduce an original texture to the interior, the cozy charm of wood, and thanks to the texture - composed of simple lines, also a subtle depth effect.

The Tellaro Wood collection blends perfectly with tiles inspired by natural materials. When combined with tiles in a cement color or tiles imitating stone, it creates a subtle contrast that, reminiscent of nature, recreates a relaxing, pleasant atmosphere of a home spa in the interior. The tiles can be used in bathrooms in wet areas and create a distinctive wall with a pronounced structure.

BOSTON WOOD

29.8×59.8

The BOSTON collection is an excellent choice for those who wish to introduce a warm, natural atmosphere into their interior. The unique lamellar structure of the tiles gives the rooms a warm and cozy look, reminiscent of the natural texture of wood. With them, you can create interiors with a distinctive character that will exude elegance and coziness.

These tiles perfectly complement modern furniture and Japandi-style accessories, creating a harmonious and pleasant living space. They can be installed on the entire wall or only on a portion of it, bringing harmony and tranquility to the interior.

OLDISH

7.5×30

The OLDISH collection takes enthusiasts of atmospheric interiors on a sentimental journey to the past and demonstrates the power of memories. Small bricks in dark green and deep blue bear visible traces of time. Characteristic shadows and burnt edges of the tiles create a weathered and aged effect on the surface, emphasizing the unique, melancholic character of the collection. Drawing inspiration from the past allows for an eye-catching result and introduces a sentimental atmosphere into the interior.

Oldish bricks, laid in a herringbone pattern, horizontally or vertically, can independently create a unique background in monochrome.
