Opoczno wood-like gres tiles in new colours

WOOD CONCEPT

Adding new colours to the Wood Concept series is a response to the growing market demand for wood-like gres. New, fashionable shades of grey and light brown they will fit into a minimalist as well as other interior styles as they do not create a too strong accent.

The arrangement, with such tiles, is timeless and can be varied by furniture or accessories. The tiles faithfully imitate the structure and graining of the wood. Aesthetic values of wood have been combined with special durability and resistance of gres.
